University of Arkansas - Fort Smith
STEM Center Focus

The goal of the UA Fort Smith's STEM Center is to assist preschool through
college math and science teachers in meeting the needs of their students
through professional development workshops, model lessons, and hands-on
training.

The UA Fort Smith Math and Science Specialists provide professional
development in science, technology, engineering and mathematics content for
Arkansas pre-service and certified teachers, UAFS faculty, parents and the
community. This assistance can be provided to individual teachers within their
own classrooms, large-scale school faculty trainings, and multi-district trainings
in the Institute's campus classrooms.

For more info on the UA Fort Smith's STEM Center, click the logo below.
