

VEX IQ ROBOTICS TRAINING

HSTI

PRE-Conference

June 11, 2019

Join us for an exciting 6 hour professional development opportunity and learn all about VEX IQ robotics curriculum and competition opportunities. VEX IQ naturally encourages teamwork, problem solving, and leadership for students. VEX has a developed curriculum with 12 standards-mapped units includes hands-on activities, instructions, assessments, and rubrics for students. This training will not only prepare the teacher to teach coding and robotics, but participants will also leave with the knowledge on how to build and prepare a competition team and apply for team grants to help fund costs. Participants will receive full access to online curriculum, a VEX IQ super kit, and a competition field and kit.
