

# TEACHER TRAINING

Learn about VEX robotics alongside  
students in grades 4-8

Hosted by The STEM Center at  
Henderson State University

Learn alongside students during this three day camp/workshop. The focus will be on how to introduce students to VEX IQ robotics components, programming methods, and construction techniques. Teachers will get the chance to gain experience with the 2019-20 Vex IQ competition challenge, "Squared Away"(see video here) . This opportunity is great for teachers wanting to learn how to facilitate a robotics class or competition team or want get a headstart on next year's competition challenge. For more information, contact the STEM Center at 870-230-5417 or see link below to register. Space is limited.
