

WORKSHOP DATE: July 19-20, 2022
WORKSHOP TIME: 8:30am-3pm
LOCATION: ASMSA, 200 Whittington Ave.
Hot Springs AR 71901

Registration: <https://tinyurl.com/ACTatASMSA2022>

Leveraging the TI-84 Plus CE Graphing Calculator for ACT[®] Test Success

In-Person Workshop Overview

This workshop is designed for mathematics educators who want to learn to leverage TI-84 Plus CE technology skills to drive student success on the ACT[®] test by exploring released test items.

Educators will cover the main elements of the ACT[®] test, discuss strategies for helping students to better understand key topics, and emphasize techniques for teaching with TI-84 Plus CE technology.

By the end of the workshop, participants should feel comfortable with:

- Leveraging the TI-84 Plus CE graphing calculator for exam questions in key categories such as number and quantity; algebra; functions; geometry; and statistics and probability
- Highlighting the key content areas on the ACT[®] test and adjusting mathematics instruction accordingly
- Implementing test preparation strategies in the mathematics classroom and using premade activities that reinforce technology skills and deepen student understanding of key topics

While the workshop is taught using TI-84 Plus CE technology, it is relevant for educators using any graphing calculator within the TI-84 Plus family.

Pricing and technology

\$300 – Workshop registration includes the following TI technology package:

- TI-84 Plus CE graphing calculator, TI-SmartView[™] CE emulator software for the TI-84 Plus graphing family

Breakfast and lunch will be provided on site. One-night lodging may be available on ASMSA campus.

Receive free registration to the [2022 Virtual T³IC](#) in July with your paid registration to a 2022 T³[™] Summer Workshop.*

Team discount: Register four educators for this workshop, and the fifth attends free.
